

## PRAIRIE WHEAT CROP 266,077,695 BUSHELS, FREE PRESS ESTIMATE

Winnipeg, Sept. 7.—The prairie wheat crop will total 266,077,695 bushels, according to the Manitoba Free Press report published today. While the wheat yield will be little more than one-half of the 1928 crop, says the report, the financial returns will be to a considerable extent offset by the loss in bushels.

Saskatchewan's yield is estimated at 151,699,394 bushels of wheat; Alberta's at 77,136,549 bushels, and Manitoba's at 37,241,750 bushels. The total prairie wheat acreage is placed at 23,158,505 acres distributed as follows: Saskatchewan 13,790,854; Alberta 6,707,526; Manitoba 2,660,125.

Manitoba, with a small wheat crop in proportion to her sister provinces, tops Alberta and Saskatchewan in average yield. According to the estimate, Manitoba will average 14 bushels to the acre, Alberta 11½ and Saskatchewan, easily the most prolific wheat province, 11 bushels. Quality of the wheat crops so far threshed, and the fact that so large a percentage of the harvesting was done in such good weather at a minimum of expense, are quoted as reasons for the high financial value of

the crop despite its comparative small size. Data is characterized as the most disappointing of all the crops, as a total of only 141,354,486 bushels is estimated from 8,157,411 acres.

The Free Press estimate is based on personal inspections and on last minute telegraphic estimates. Acreage figures issued by the Dominion bureau of statistics are used.

Following are the estimated yields of other grains: Barley 76,445,363 bushels, rye 9,648,000 bushels, flax 2,932,898 bushels.

Manitoba is estimated to be the largest producer of barley with 40,682,523 bushels. Saskatchewan, however, leads in oats, rye and flax. Yields for the province are estimated as follows: Oats 65,381,205, rye 5,652,876 and flax 2,235,312.

## FOLLOWED SUIT

"What did you say when you proposed to Muriel?"

"I told her the truth. I said: 'I am nothing, I have nothing, and I can do nothing.'"

"What did she do?"

"She did nothing."—Nottingham Evening News.

Correct this sentence: "She was singing happily," said the gossip, "and washing cold fried eggs from a breakfast plate."

## They Speak Your Language

THERE was a time when you had to take an interpreter into the store with you when you went shopping, a few hundred miles from home. The things they had for sale were hard to recognize. Even familiar products were sold in strange forms, and under queer names.

It was one of the disadvantages of travel that had to be taken along with the pleasures.

Nowadays the millions of Americans who go visiting their neighbors North, South, East and West, encounter no such difficulty. The picturesque beauty, the quaint customs that make other sections of the country different and delightful have all their old appeal. You can still hear mellow mission bells in California. You can eat terrapin in Baltimore, or sleep in a Vermont farm-house under an Ethan Allen quilt. But in any of these localities you can buy your favorite toilet soap, or breakfast cereal, or automobile tires as readily as in your own town.

The trade-marks and the packages speak your language. National advertising has made good brands of merchandise uniformly known from coast to coast.

If you read the advertisements and use advertised goods, you are at home in any store in America.

## MAKE WAR IMPOSSIBLE SAYS PREMIER BRIAND IN NOTABLE SPEECH AT GENEVA MEETING

Geneva, Sept. 5.—Premier A. Briand of France today made one of the most notable speeches of his career before the assembly of the league of nations. With all the eloquence for which he is famous, with his animated gestures and in a tone of intense earnestness, he pleaded for the reign of peace.

His declarations brought the assembly cheering to its feet. France had, he alleged, signed the optional clause of the world court to which Britain and Canada announced their adhesion this week. But owing to a reservation the French signature has not yet become effective. On this point, M. Briand promised that before the end of the assembly he would reopen it. He went further in connection with the general arbitration act and said he wished to cover arbitration for all disputes.

Raising his right hand, the former Premier declared: "I do solemnly pledge myself that when I return, I shall do everything I can to have the French parliament ratify the act."

M. Briand did not say specifically but many who heard him interpreted his statement as meaning that he would resign if he failed.

Premier Briand said the league's decade of life had demonstrated its active power in many domains over the heavy difficulties which faced it at first. It had the confidence of all peoples and was a great moral force. He insisted that the pact signed in Paris last year was really framed from the ideals of the league, and announced that he had deposited a text of it with the league for registration.

Says War Is Crime  
M. Briand declared war had been condemned as a crime, but it was now essential not only to condemn war, but also to make war impossible. The French premier remarked that at the Hague reparations conference he would have been untrue to peace and concord if he had allowed millions of money to prevent France from helping to liquidate the problems of the great war. He had a firm hope that the Anglo-American naval conversations would succeed and that the disarmament commis-

## GARDINER GOVERNMENT IS DEFEATED — ANDERSON AMENDMENT OF NO CONFIDENCE CARRIED IN EARLY HOURS OF MORNING BY 31 TO 27

Regina, Sept. 6.—The Gardiner government has been defeated. By an adverse vote of 34 to 27, the administration was voted out of office in the early hours of this morning on a non-confidence amendment moved by Dr. J. T. M. Anderson, Co-operative leader. After a continuous reign of 24 years, a Liberal government steps out of office.

Conservatives, twenty-three in number, with their allied group of five Progressives and six Independents, solidly lined up for the amendment. Liberals alone voted against, with the exception of D. A. Hall, Cumberland, who was not present. Scenes of wild excitement prevailed when the vote was announced. Co-operative members joyously gathered in their lobby congratulating one another. Liberal members quietly filed out.

Regina, Sask., Sept. 6.—Premier J. G. Gardiner has placed his resignation in the hands of Lieutenant-Governor H. W. Newlands. His honor accepted the resignation to take effect on Monday next. Premier Gardiner has advised the lieutenant-governor to call on Dr. J. T. M. Anderson, Co-operative leader, to form a new government. His honor is sending for Dr. Anderson to request him to take the premiership of Saskatchewan.

Dr. Anderson has accepted the task. The Co-operative leader will be sworn in immediately the resignation of Premier Gardiner comes into effect on Monday.

New Cabinet Announced  
Regina, Sask., Sept. 9.—The new Co-operative cabinet sworn in this afternoon is officially announced as follows:

Hon. J. T. M. Anderson of Saskatoon, president of council and minister of education.

Hon. M. A. MacPherson of Regina, attorney-general.

Hon. W. C. Buckle of Tisdale, minister of agriculture.

Hon. J. A. Merkle of Moose Jaw, minister in charge of bureau of labor and industries and provincial secretary.

Hon. H. McConnell of Saskatoon, provincial treasurer, minister of municipal affairs and minister in charge of office of king's printer, bureau of publications, the loan companies act, and the trust companies act.

Hon. A. F. Bryant of Regina, M. L. A. for Lumsden, minister of public works, minister of telegraphs and telephones, and minister in charge of the fire prevention act, the prairie and forest fires act and the Saskatchewan insurance act.

Hon. Dr. F. Munroe, Meosomin, minister of public health and minister in charge of child welfare act.

Hon. A. C. Stewart of Yorkton, minister of highways and minister of railways.

Hon. Dr. R. Stipe, of Hanley, minister without portfolio.

Progressive Likely Speaker  
R. J. Leslie, Progressive, Weyburn, will probably be the next speaker in succession to J. F. Bryant, who has been appointed minister of public works.

## HIS JOB

Chief: "What was your last job?"  
Applicant: "I worked at a school that taught how to write well."  
"But what did you do there?"  
"I had to jog the table while the new pupils wrote. This is a specimen of my handwriting before taking Scrib's writing course."—Lustige Kolner Zeitung (Cologne).

How to stop crime? Well, people stopped making buggies when advancing civilization made it unprofitable.

## DRASTIC CHANGES ARE URGED IN REPORT OF GRAIN COMMISSION

Regina, Sask., Sept. 6.—The report of the Saskatchewan Royal Grain Commission, headed by Chief Justice J. T. Brown of this province, was tabled in the legislature Thursday afternoon.

Main recommendations in the report are for complete revision of the Canada Grain Act, wider powers for the Dominion Board of Grain Commissioners, and provisions for more effective enforcement of its decisions, alterations in constitution of grain appeal boards, changing in the elimination of mixing of grain of higher grades in terminal elevators, prohibition of the mixing of grades in country elevators, discontinuance of mixing of Western Canada grain with grain of American origin in certain public elevators, opposition to a request for a 100 per cent. pool by legislation without government control or non-pol representation and consideration for question of rescinding legislation for double standards for grading farmers' grain.

List of Recommendations  
Recommendations made by the report are as follows:

(1) That the many recommendations made in its interim report be put into effect where that has not already been done.

(2) That the Board of Grain Commissioners and its members be given wider powers with provision for more effective enforcement of its decisions.

(3) That consideration be given to the advisability of rescinding the legislation of 1929 in authorizing the board to provide a double standard for grading farmers' grain and in requiring the inspector to grade otherwise than on the intrinsic value of the official standard.

(4) That the standard for grading grain out of terminal elevators consisting of 75 per cent. of the average of the grade and 25 per cent. of the minimum and which has already been applied to "Spring wheat" be also applied to Durum wheat, barley, oats, rye and other grains.

(5) That "tough" and "damp" grain should not be allowed to be mixed with the straight grades.

(6) That all damp grain be dried and inspected out of the terminal elevator as "dried" of the grade to which it belongs.

(7) That it be left optional with the terminal elevator to dry "tough" grain. If the grain be dried, that it be inspected out as "dried" of the grade to which it belongs, but if left in its tough condition, that it be inspected out as "tough" of the grade to which it belongs.

Concerning Grades  
(8) That the board make regulations to govern the operation of driers so as to ensure proper supervision by the inspection branch.

(9) That the grade No. 1 Manitoba hard wheat be done away with and merged in No. 1 Manitoba northern.

(10) That Kota wheat as a special grade be dispensed with.

(11) That Garnet wheat be given recognition as a distinct variety with its several grades and binned separately unless the test now being made with reference to this grain determine otherwise.

(12) That grades Nos. 2 and 3 Manitoba northern wheat be redefined.

(13) That No. 4 commercial wheat be defined and made a statutory grade.

(14) That Nos. 1, 2 and 3 C. W. Amber Durum be redefined.

(15) That the board appoint a committee of experts to define the grades where a definition or redefinition is suggested.

(16) That the terms "no grade," "rejected," and "condemned" be done away with as prejudicially affecting and not being truly descriptive of the character of the grain to which the terms are attached.

Mixing Practice Unsound  
(17) That the practice of mixing of grain of different grades in the terminal elevators is unsound in principle and unnecessary in practice and should be prohibited in the higher grades of all grain and in lower grades as well, unless the standard of 75 per cent. of the average and 25 per cent. of the minimum is applied to such lower grades.

(18) That grain which is off grade and can be processed be made fit for a straight grade be allowed into the grade under proper supervision.

(19) That grain which is damaged and cannot by any known process be made fit for a straight grade such as "smutty," "bin burnt," "heated," "musty" and "sour" should not under any circumstances be allowed into the grade.

(20) That mixing of grades in country elevators be prohibited.

(21) That "oat scalping" be made a commercial grain and settled for as such.

(22) That provision should be made whereby the farmer would be paid the real market value for his screenings.

(23) That the percentage of screenings allowed in care and cargoes without dockage be reduced.

(24) That no cargo be allowed to leave a terminal elevator under a straight grade certificate if it contains excess dockage. If it is allowed to leave the elevator with excess dockage it should be specially binned and not allowed to mingle with the straight grade in the transfer house.

(25) That more attention be given to recruiting men for the inspection branch and training them in grading grain.

(26) That inspectors and deputies occasionally for limited periods of time be moved to other inspection points in order to keep them in line in their grading and to widen their experience.

Check Inspection Work  
(27) That a travelling inspector be appointed to visit the various in-

spection points and check up the work of the inspection staff at such points.

(28) That the automatic sampler be installed in all terminal elevators for the purpose of grading cars of incoming grain and also wherever possible for grading the outgoing cargo.

(29) That final inspection on a car of grain be made on the unload sample with the right of re-inspection and appeal extended to a period of 30 days.

(30) That a provisional grade only be given at the initial inspection point for the purpose of assisting in the binning of the grain.

(31) That the constitution of grain appeal boards be altered so that each board shall hereafter consist of three trained inspectors; that one board be located at Fort William and another at Vancouver.

(32) That railway companies be required to give more attention to co-operating and cleaning grain cars so that these cars when spotted for grain purposes will be reasonably fit for the carrying of grain.

(33) That the bulk heading of grain in cars by bags filled with grain be adopted by the farmer and elevator agent on the grounds of both efficiency and economy as compared with the methods at present adopted.

(34) In order that the chief inspector may have immediate knowledge of the quality of every cargo sent abroad, a sample of such cargo should be taken by the inspection branch and a portion thereof forwarded forthwith to the chief inspector.

(35) That the board be authorized to appoint the survey boards in the eastern inspection division without restriction.

100 Per Cent. Pool Proposal  
(36) That all public and terminal elevators in the eastern inspection division handling western grain be required to comply with the act and take out a license from the Board of Grain Commissioners, thus placing themselves under the supervision of the board.

(37) That the mixing of Western Canada grain with grain of American origin in certain public elevators in the eastern inspection division be discontinued as contrary to the provisions of the Canada Grain Act, and that the inspection branch discontinue the practice of inspecting such grain and granting certificates of inspection therefore as being unauthorized and illegal.

(38) That we have seriously considered the request of those who wish a 100 per cent. pool by legislation without governmental control or non-pol representation and we find that there is no precedent for such legislation and believe that the scheme suggested is beset with difficulties and dangers and one therefore which we cannot recommend.

(39) That the rules and regulations of the Board of Grain Commissioners should be revised and consolidated and printed in booklet form so as to be readily available to anyone desiring same, and all amendments and additions thereto should receive due publicity.

(40) That the Canada Grain Act should be completely revised so as to incorporate the many amendments suggested and so as to take care of conflicting and ambiguous sections that already exist therein.

FRANCE SENDING IMMIGRANTS TO CANADA  
Montreal, Sept. 10.—Heralding the arrival later of more than twenty families who are to come direct from France to settle on farm land in Canada, two families comprising some dozen souls reached Montreal, by the Cunarder Ascania, to settle under the auspices of the Canadian National Railways.

The two families who arrived are the first actual settlers to come from France to Canada in many years, and they are merely the forerunners of other families who will come out next spring.

## BRUCE GOVT. IN AUSTRALIA MEETS DEFEAT—BEATEN BY ONE VOTE IN COMMITTEE STAGE OF CONTENTIOUS BILL

Canberra, Australia, Sept. 10.—The Australian government of Premier Bruce suffered defeat by one vote today during the committee stage of a bill to abolish federation in labor disputes.

It was later stated that government leaders were considering their position and might be forced to resign.

An amendment to postpone the operation of the arbitration abolition bill pending reference to the electors was carried by 35 votes to 34.

Premier Bruce secured adjournment to enable him to consider the situation with his supporters but dissolution of parliament is expected tomorrow. Several members of the Nationalists party voted against the government.

The present Australian federal parliament held new elections in the lower house November, 1928. The strength of the parties then returned was: Labor, 31; Nationalists, 29; Country party, 3; Independents, 2.

The Labor party, although the strongest single body, is in opposition. Premier Bruce governing the federal parliament through a coalition of the Nationalists and their allies in the Country Party.

If your boy loaf at the barber shop, picking a guitar and singing through his nose, don't be discouraged. Soon or late they'll have him making phonograph records.

## THE DRAMA IN PALESTINE

Every Christian, every churchman, every minister in Christendom is watching with attentive eyes the latest drama of religious fanaticism unfold in the Holy Land.

All Christendom watches this present struggle because it involves the security of a land rich in biblical history and prophecy. All Christendom watches this struggle with concern because it involves the future of the Jewish race, which is the key-

stone of biblical history and prophecy.

Beyond the religious consideration of the warfare that has broken out between the Moslems and the Jews, there is the consideration of justice. This Palestine country is the traditional home of the Jews. It is theirs by every racial, political and religious right.

It was won back for them by the British army, not as a favor to the Jewish people, but on the proposition that Palestine could be developed to better advantage of the British by economically sound Jewish methods than by the ambitious methods of the fanatic Arabs.

It would be highly regrettable, not only from the standpoint of the British, but from the standpoint of the whole Christian world, if savage fanaticism were permitted to halt or even retard the efforts of the British and the Zionists to build up a modern efficient state in Palestine, which has rotted in comparative uselessness for the past thousand years.

## MANDATES AND MASSACRES

Great Britain, engaged in putting down riotous Arabs who are charged with massacre of Jews in Palestine, an 80 per cent Arabic country, is faced with divided opinion at home. One section would have her hand back the Palestine mandate to the League of Nations. The other declares only a firm stand for the Bal-

# Robin Hood FLOUR

## For All Your BAKING

four declaration will save British prestige in the Near East.

Arab unrest is both racial and religious. Dispute over the Wailing Wall in Jerusalem furnished the excuse for a flareup. But behind that is the real cause, Moslem jealousy for dominance which it fears the powers, through the League, will take away.

Britain's Labor Government faces the double target of lower prestige among a quarter billion in the East, and of blame at home for the outbreak. The first is real, the second political. The cause dates back before Labor took office, just as the causes of Britain's general strike antedated the previous Labor regime, but leaving Labor to bear the brunt in both cases.

To be logical, all mandates should be under the League, giving the powers joint responsibility. Britain keeps her mandate because: (1) Other powers have mandates; (2) The majority of Moslems are already in the Empire; (3) Dilatory policy at Geneva might be disastrous in uprisings where swift action is imperative; (4) Britain is a dominant force in the League which laid down the mandates policy, and must take responsibility for initiative in reverse of that policy.

Until a full enquiry places the blame for this uprising, neither school of mandate opinion is entitled to hamper the Labor Government. If the revolt is found to have occurred in spite of competent control, then the sooner Britain returns her firebrand mandate to the League the better. But if it occurred because of incompetent control, then continuance of the mandate is imperative.

## THE TOURIST GROWS CAREFUL

It is a tradition—started by whom and when it is impossible to find out—that the tourist is the most careless, inconsiderate and thoughtless of all living mortals.

Happily, however, it begins to look as if the tourist is mending his ways. A bulletin from Superintendent J. Ross Eakin of Glacier National Park, discussing forest fires in that American national park, says that forest fires now are started by natural causes, such as lightning. "Carelessness in handling camp fires, smoldering cigars, cigarettes and matches at one time presented quite a problem," he writes, "but in the last few years, thanks to the co-operation of park visitors, this cause has been reduced."

If the tourist is learning the great lesson about taking care with fire hazards, the old tradition will have to be revised.

## HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION—BABY'S FOOD

Every baby should be breast-fed. There are few mothers who cannot nurse their babies if they try to do so, and there are few mothers who would not make the effort if they understood how important it is that the baby should have his natural food. There is no other milk, or no preparation which is just as good as breast milk. Breast milk is purer, cleaner and more easily digested than any other food, and it requires no preparation.

Mothers sometimes wean their babies because they think that they have not enough milk, or that the quality of their milk is no good. This is a serious mistake. Every effort should be made to keep up the quantity available, and it is much better for the baby that he receive some breast milk than none at all. If there is not sufficient breast milk, the necessary supplementary amount of nourishment is given after the nursing according to the feeding formula given by the physician.

The baby should be fed at regular intervals. Not only is this desirable from the standpoint of his digestion, but it is important as the start of proper habits in the child. If he is asleep at nursing time, he should be awakened, and he should not be allowed to fall asleep while he is at the breast. The feeding takes from ten to fifteen minutes. After feeding, the baby should be held up over the shoulder in order to allow him to get rid of the air which he has swallowed.

During the hot weather particularly, the fact that babies become thirsty should not be forgotten, and the baby should be offered cooled water, previously boiled if there is any question of purity, between feedings.

Under ordinary conditions, the baby is nursed for eight or nine months; longer periods are not good for the child. The baby should not be weaned excepting upon the advice of the doctor who will advise as to what diet he is to receive. As a

rule, babies are not weaned during the hot summer months.

Best-feeding makes, for stronger, healthier babies, and it protects them from the dangers of disease. Artificial feeding, even of the highest quality, is, at the best, an attempt to imitate the natural feeding.

Questions, concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by correspondence.

## \$2,000 BLAZE ON ORTON FARM—CHAMPNEY AND SONS SUPER SERIOUS LOSS—CAR IS DESTROYED

A fire on the evening of Sept. 2, on the farm of E. Champney and Sons, destroyed the granary and garage with a new 1929 Chevrolet car, about 25 bushels of wheat, stoves, farming mill, tools and other things. All was a total loss except the car, which was covered by insurance.

The fire is supposed to have started on an oil stove which was being used to warm the work shop, as some of the men were doing repair work on a separator. The men, thinking it had gone out, went in to supper. During the meal they were made aware of the fire by someone who in passing saw the blaze.

They were too late to save anything, as a northeast wind was blowing and so much oil and rags being around the building. The loss is estimated at \$2,000.

## BRITAIN WINS SCHNEIDER CUP RACE—SPEED RECORDS ARE SET BY BRITISHER IN SEA-PLANE RACE

Ryde, Isle of Wight, Sept. 7.—Great Britain won the tenth Schneider cup race over the Solent course today, with Flying Officer H. R. D. Waghorn setting a new world's record for speed of 329 miles an hour on the course.

331 Miles an Hour  
Ryde, Isle of Wight, Sept. 7.—Travelling at speeds hitherto unknown to man, first British and Italian entries in the Schneider cup speed trophy air race roared around the Solent course today, a streak of red pursuing silver. Official and unofficial world speeds were already broken by British flying officer, H. R. D. Waghorn before he had completed his run with a new high mark of 331.10 miles an hour.

Goes One Better  
Ryde, Sept. 7.—Flying Officer R. L. R. Atcherly, of the British Schneider cup team, and favorite in the race, broke the world's record in his fourth lap on the Solent course in 322.49 miles an hour. His time was 1:39 miles better than the mark Waghorn set in the first of the course races, but he had yet to equal Waghorn's average for the Schneider trophy. On his fifth lap, Atcherly made 328.29.

Is Disqualified  
Ryde, Isle of Wight, Sept. 7.—Flying Officer R. L. R. Atcherly, who announced to have set a new world's speed record of 332.40 miles an hour in a lap of the Schneider cup races today lost his record immediately to his brother officer, H. R. D. Waghorn, when he was disqualified.

Record For First Lap  
Ryde, Isle of Wight, Sept. 7.—Flying officer H. R. D. Waghorn, of the British Schneider cup team set a new world's speed record of 329 miles per hour in the second lap of the Blue Ribbon air speed trophy today over a closed circuit of fifty kilometers. He broke the record in his first lap with 324 miles per hour.

Perfect Weather  
Culshot, Eng., Sept. 7.—Perfect weather prevailed over the Solent course for the Schneider Cup air races as officials and contestants assembled for their hazardous contest today. A silent breeze was blowing, which if it stiffened might increase the dangers, but it was not believed this would happen. Visibility was exceptionally good.

FORCING BULBS FOR WINTER BLOOM  
There are few house plants that reward the grower with a finer display of bloom in such a short time and with so little attention as do the spring flowering bulbs when forced in winter. Those most commonly forced include tulips, hyacinths, daffodils, and crocuses and they come in such variety that the amateur is likely to be bewildered by the long lists of names. However, a careful study of the bulb catalogues enables one to choose a collection that will give a succession of bloom beginning in early December and lasting until the tulips bloom out of doors in late May.

Bulbs should be potted as soon as they are received in September and October. Those intended for very early bloom may be had in September, but the main supplies are not on the market until October. A good potting soil consists of equal parts of loam, well-decayed cow manure, leaf mould, and sand. The size and style of pot used will depend to some extent on the personal preference of the grower, but a six-inch pot will hold six tulips, a five-inch pot takes six crocus bulbs, a four or five-inch pot may be used for a single hyacinth bulb and a seven or eight inch pot will be required for five or six narcissus bulbs.

In potting, leave the top of the bulbs level with the surface of the soil and press it firmly about them but do not have it too compact beneath them since this causes heaving when root growth takes place. After planting, water the pots and set them in a cellar or darkened room at a temperature of 40 to 50 degrees Fahrenheit. If the pots are plunged in sand they will require less careful watering, and burying to a depth of two inches above the bulbs will help to prevent heaving. After the bulbs are well rooted and there is evidence of top growth, they may be brought to the living room to bloom. To economize in window space a cellar window or any north window may be used until the plants closely approach the blooming period. If kept too long in a dim light the plants become tall and weak-stemmed. If placed in too hot a place the buds will wither, therefore a window too close to a stove should be avoided.

After the plants are in bloom if they are kept in a cool part of the room and not exposed to bright sunshine the blossoms will last for twelve or fourteen days.

At the Dominion Experimental Station, Rothorn, Saskatchewan, the following varieties have been found satisfactory for forcing: Early single Tulips.—Duc Van Tholl, Proserpine, Brilliant Star, Coueur De Cardinal, Cramoieille Brilliant, Cullinan, Flamingo, La Reine, Mon Tresor, Prince of Austria, Prosperity, Rose Griselin, Rose, Luisante, White Hawk, Yellow Prince, Fred Moore, and Dis.

Early double Tulips.—Peach Blossom, Muriel and Couronne d'Or. Darwin Tulips.—Bartigon, Wm. Copeland, and Roi d'Alain. French Roman Hyacinth. Dutch Hyacinths.—Gertrude, Queen of the Pinks, La Victoire, Lady Derby, Marconi, L'Innocence, La Grandesse, Enchantress, Grand Maitre, King of the Blues, and Queen of the Blues. Narcissus or Daffodils.—Victoria, Glory of Sassenheim, Tresserve, Princess, King Alfred, Sir Watkin, and Double Von Seion.

Polyanthus.—Narcissus or Bunch Daffodils.—Paper White and Grand Soleil d'Or. CROCUS.—Purpurea grandiflora, Mont Blanc and Yellow.

PUZZLED  
"I want to order some flesh-colored stockings," said the voice over the phone.  
"Yes, mam, and what kind will you want—pink, yellow, copper, or black?"—Christian Science Monitor.

Returning vacationists seem to feel better because they're so darned glad to get back home.

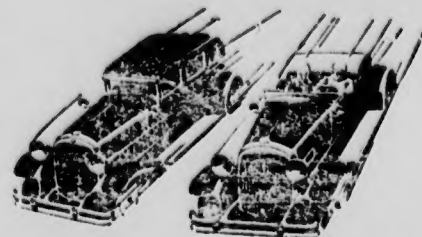

Tariff: A method of shearing a flock of sheep to make a nice coat for the poor shivering lion.

# ESSEX

## THE CHALLENGER

# first prize

## for reliability

The Grand Prize for reliability in the 15-day running of the famous "Tour de France" was awarded to Essex the Challenger. The two Essex entries finished the race without a single penalty—the only cars with perfect scores—winning by a great margin over the strong field of high-priced American and European cars. . . . Not only the Grand Prize, but the Ansaldo Cup, for quick getaway; the Lyonnais Cup, the Pyrenees Cup, the Atlantic Cup, the Cup of Brittany, the Cup of Normandy and the Cup of the North were also taken by Essex the Challenger.

## Performs Like a Costly Car Because Built Like a Costly Car

Essex the Challenger looks and acts like a costly car because it is built like a costly car. Its enormous success has inspired others to claim qualities "like Essex". Yet everything about it—appearance, performance, comfort and luxurious smoothness—mark it apart and altogether different.

To be like Essex without building like Essex is a goal no car has found possible. More than 200,000 owners know the outright facts. You can know them too in 30 minutes behind the wheel.

You can only find comparison for Essex qualities among costly cars, because in design and construction it stands with the practice of the fine car field.

## All These "Extras" at No Extra Cost

Its good size and impressive appearance appeal to those who want comfort, distinction and good looks. Its completeness in the things which contribute to costlier car advantages, is outstanding. Radiator shutters—side lamps—chromium plated bright work—four hydraulic shock absorbers—adult size roominess and adjustable seats are details only costlier cars have provided.

Wide Choice of Color at no extra cost

# \$840

### P. BURNS COMPANY ACQUIRES MAIN ST. PROPERTY IN MACLEOD — IMPORTANT PROPERTY TRANSACTION CLOSED — PLAN IMPROVEMENTS

An important Main Street property deal was put through last week in Macleod, when the P. Burns Company, Ltd., became the owners of the fine two-story block, the store they have occupied as their meat market for twelve or fifteen years. The purchase price has not been stated.

The upstairs has been occupied as apartment rooms, and it is understood that considerable alterations and improvements will be made on the building, especially on the upstairs apartments. The purchase of this block by the Burns Company shows their faith in Macleod as a trading centre.

The P. Burns company have been in the meat and cattle business from the earliest years of Macleod, and for many years were owners of the corner lot where the Sheffield garage now stands. It was the intention of the company to build a handsome block on that corner, but the bad years and hard times hit the district, the block was not built and eventually the lot was sold to George Sheffield. Now they have bought the block where they have been located and which is much more central.

### WHEAT POOL NOTES

The Alberta Wheat Pool is making a determined effort to point out to Pool members the importance of delivering Pool grain to Pool elevators wherever it is possible, in view of the light crop in Alberta this year.

The Pool elevator system was built up for the purpose of giving service and protection to the membership. Three years ago there were 4 Pool elevators in Alberta. To-day there are 437, representing an investment of over six million dollars of Pool farmers' money. This investment must be protected.

Pool members should realize that it is a matter of very great importance for the Selling Agency to have Pool wheat readily available at all times. When Pool wheat is delivered to Pool elevators it is always available to the Selling Agency.

This great elevator system was developed because Pool farmers insisted that this course be taken. For years the head office of the Wheat Pool has been deluged with requests and even demands for Pool elevators. Now it is up to Pool farmers to show their appreciation of their own system by delivering their wheat to Pool elevators.

The introduction of combines and auto trucks has speeded up harvesting on the Canadian prairies to a remarkable degree. The result has been an unprecedented flow of grain to the elevators during a brief period in the fall. In order to restrict this glut as much as possible the Alberta Wheat Pool is offering a bonus of 2 cents a bushel for wheat held on farms until December 2nd, 1929.

Wheat producers should realize it is not good business to deliver the crop in such a hurried manner that it has a reactionary effect on the market. The Wheat Pool has not made a practice of compelling Pool farmers to deliver their crop in one crop year. For instance: some Pool farmers have carried wheat from their 1928 crop past the date of the closing of the 1928 Pool, which was July 15th, and delivered this grain to the 1929 Pool. No objections have been made by the Pool against this practice. A recent news item issued by the Wheat Pool mentioned that action had been taken against a few Pool members who had not delivered their 1928 wheat to the Pool. This has been construed by some to mean that all Pool wheat should be delivered within the Pool year. As a matter of fact the action was taken because the wheat had been delivered outside the Pool.

### TOURISTS FROM U. S. MAY RETURN WITH GOODS WORTH \$100

Removal of vacation restrictions on tourists has long been urged at conventions of the Alberta Motor Association. It has been shown that this country is desirous of making a strong appeal to motorists from south of the border, this being the country to which a large percentage of them intend to drive for holiday jaunts.

There is therefore satisfaction among those promoting the work of the A. M. A. over the recent announcement from Washington that tourists will have no trouble taking purchases back to their own country so long as they follow instructions.

Writing from the U. S. capital to the Ontario Motor League, F. A. Weber, U. S. Commissioner of Customs, stated that the provisions still remain which allow tourists to bring back from Canada souvenirs of their visit in the shape of wearing apparel, table linen, pictures, books, musical instruments, pipes, cutlery, chinaware, stationery and "bric-a-brac" up to \$100 in value free of duty. This definite ruling was obtained as the U. S. bureau had ruled in a recent case that a desk brought in from abroad was not entitled to free entry. His reply shows that the old ruling in respect to tourists visiting Canada still stands, despite the recent decision.

### THE EDITOR SPEAKS

When Walter H. Page was editing the Atlantic Monthly, a woman contributor sent him a story.

She believed editors usually rejected the MSS. of unknown authors without reading them, and therefore set a trap for Page by pasting together certain sheets.

The MSS. was returned with these sheets undisturbed. The angry woman wrote to Page, explaining how she had caught him, and denouncing the whole editorial tribe as humbugs.

"Dear Madam," Page immediately wrote back in reply. "When I break an egg at breakfast, do not have to eat the whole of it to find out that it is bad."—Chicago Tribune Ocean Times.

### FALL SESSION OF LETHBRIDGE PRESBYTERY OF THE UNITED CHURCH WILL CONVENE AT MACLEOD

The autumn session of the Lethbridge Presbytery of the United Church will convene at 2 p. m. on Thursday, September 12th, in the United Church, Macleod. At 6:15 the Ladies' Aid will serve supper to the Presbytery delegates, resident clergy of Macleod and the United Church Board of management.

On Thursday evening at 8 o'clock a public meeting will be held in the Church, when Rev. Dr. Charles Endicott of the United Church missionary department will speak on "The New World and the Missionary Church," outlining the World situation in relation to Christianity.

It is expected that interesting discussions will take place during the sessions, relative to the work of the church in the Presbytery and among the items of business will be the election of a presiding officer to succeed Rev. Norman King of Lethbridge, who is having a year's leave of absence for his health.

The public is invited to the Thursday evening meeting, which is expected to be especially interesting with such a noted churchman as Dr. Endicott giving the address on world problems. The choir will also render special music.

### SMART BLACK HENS

### ROYAL PURPLE DANCE GREAT SUCCESS—ROY RAMSBOTTOM WINS CEDAR CHEST

Success is the watchword of the ladies of the Royal Purple Lodge of Macleod. The big ball they put on last Friday night was no exception to that rule. This was their first dance for the season, and although a little early, still it was quite a success. The reason for having the dance early was the big event of drawing for the cedar chest for which the ladies have been selling tickets for the past few months, and on the contents of which they have devoted many hours of labor in making and embroidering the many beautiful and useful articles which the chest contained. Two out of every imaginable article required in a home of linen, wool and cotton, for bed, table and decoration, was included, and words fail to express in describing the amount of beautiful hand work that was done on the various articles.

At midnight, after full justice had been done to the lunch prepared by the ladies of the lodge, Chief of Police Pringle stepped forward with the box of ticket stubs and drew the winning number, which was 1015, and Roy Ramsbottom was the lucky holder of the ticket. Roy is the son of Mr. and Mrs. J. E. Ramsbottom of the C. P. R., Macleod, and the lucky ticket was only purchased in the hall during the evening.

The hall was beautifully decorated for the occasion with the colors of the order, purple and white, and the initials of the order was displayed in large letters on the wall "O.O.R.P." Great credit is due to Miss Marjory Greenwood and Miss Josie DeMan, who superintended the decorations. Mrs. Ray Baker, Honorable Royal Lady of the lodge, was in supreme command, and Mrs. Bailey was convener of the general committee. Those taking an active part were Mrs. Greenwood, Mrs. Ramsbottom, Mrs. Wall, Mrs. Joe Graham, Mrs. Boardman, Mrs. E. Thompson. Edgar's orchestra supplied the music, which was bright and lively and much enjoyed.

### THE ALPHABET LESSON

Little Charles was learning the alphabet.

"Now, this is big U," said his mother, pointing to the capital letter, "and this one beside it is little u. Can you remember that?"

"Oh, yes," the child replied, confidently. The next day his mother pointed to the same letters again.

"Can you tell me this morning what these letters are?" she asked him.

Charles's face beamed with pride as his chubby little finger pointed to the bold letters in his book.

"This," he said, "is big me and this is little me."—Indianapolis News.

### TIME TO LEAVE

Mr. Staylate (to fiancée): "If I had enough money I'd travel."

Her Father (from next room): "Just how much do you need?"—Christian Science Monitor.

### Empress Theater Current Attractions

#### "FREEDOM OF THE PRESS" A STIRRING FILM PLAY

For sheer sweep and power, "Freedom of the Press," Wednesday and Thursday, Sept. 18th and 19th has few equals.

From the very beginning when you see Lewis Stone as the crooked political boss fighting his boyhood chum, now the editor of the Free Press, played by Henry B. Walthall who is conducting a fierce campaign to bring out the identity of the members of the vice ring, you know you are in for a thrilling hour or more of entertainment. One is as ruthless in his pursuit of good as the other is of evil.

Both men give remarkably powerful characterizations meriting praise as the finest performances of the month on the local screen.

The love story is moving in its pathos but finally emerges triumphant. Marceline Day and Malcolm McGregor furnish the juvenile interest with sincerity.

#### "THE MAN WHO LAUGHS" COMING AS PHOTOGRAPHIC—VICTOR HUGO'S IMMORTAL STORY TO BE SEEN ON SCREEN OF EMPRESS THEATRE

Victor Hugo's immortal romance, "The Man Who Laughs," has at last been made into a motion picture. With infinite effort and at great expense, the Universal Pictures Corporation has translated the stirring story of early English court intrigue into a super-production that mirrors Hugo's unusual and colorful characters and events in gripping scenes. It will open at the Empress Theatre on Monday for a run of two days.

Screen Classic  
The filming of "The Man Who Laughs" was sponsored by Carl Laemmle, the same motion picture impresario who brought Hugo's "The Hunchback of Notre Dame" to the screen. The same producer was instrumental in presenting the French-made "Les Misérables" to American screen lovers. These two photodramas have become screen classics. The new Hugo rendition is expected to be even more of a success, not only with Victor Hugo readers, but with all lovers of gripping drama and colorful romance.

Gigantic Sets  
Big sets are featured. Among them is the great Southwark Fair, London's great Coney Island of two centuries ago. Another is the House of Lords in full session, a remarkable scene. London streets, the royal castles, baronial halls, exotic boudoirs, and striking coastal and dock scenes are also shown. Through these scenes and before these back-grounds move the vivid characters of Hugo's story, played by the pick of Hollywood's most capable actors and actresses.

## The Wallace Tractor

The Tractor on the farm arose before the dawn at four; It drove up crows and washed the clothes, And finished every chore.

Then forth it went, into the field, Just at the break of day; It reaped and threshed the golden yield, And hauled it all away.

It plowed the field that afternoon, And when the job was through, It hummed a pleasant little tune, And churned the butter, too.

And pumped the water for the stock, And ground a crib of corn, And hauled the baby round the block, To still its cries forlorn.

Thus ran the busy hours away, By many a labor blest; And, yet, when fell the twilight gray The tractor had no rest.

For, while the farmer, peaceful-eyed, Read by the Tungsten's glow, The patient tractor stood outside, And ran the dynamo.

## LOCAL AND PERSONAL NEWS

P. C. Shaw of Calgary is a business visitor in Macleod this week.

C. F. Carswell, barrister, Granum was in Macleod on Tuesday attending the sittings of the District Court.

David Hofer of the Hutterite colony Pincher Creek, was in Macleod last Friday, looking for an experienced teacher for their Hutterite School.

Tom Mackintosh, of Vancouver formerly of Macleod was a visitor in Macleod and district last week, visiting relatives and friends. Tom has a good position with the B. C. Telephone Company.

The Hon. Frank and Mrs. Oliver of Ottawa were visitors in Macleod last week for a few days, they were registered at the American Hotel. The Hon. Frank was renewing old acquaintances, but very few are left in Macleod of those who took part in the big election fight of 1896 when Mr. Oliver was returned as the first Liberal member for the Macleod federal riding.

Another evidence of confidence of stability of Macleod and district as a developing business centre, is shown by the large extension which the United Grain Growers is making to their elevator at Macleod. They are building an addition to the elevator of a warehouse, to contain four bins capable of holding 25,000 bushels, the size being 36x44. This will give them a capacity of about 75,000 bushels and it is fully expected that the space will be taxed to the limit to accommodate the amount of grain they expect to handle from the

splendid crop of the district this year.

J. Thorne of Claresholm, formerly of Macleod, was in Macleod on Tuesday and Wednesday.

Mrs. George Parker of Lethbridge was a visitor in Macleod on Friday and took in the Royal Purple Ball.

Miss Annora Brown, A. O. C. A. daughter of Mr. and Mrs. E. Forster Brown, arrived in Macleod last week from Toronto to spend a holiday with her parents. Miss Brown has now completed her studies at the Ontario College of Art.

Mrs. J. Dillingham had as her guests on Wednesday Miss A. Campbell of Calgary, Mrs. J. Walker of Carmangay and Mrs. A. Gaetz of Champion, they having motored over from Carmangay for the day.

Smithson-Rothney—A very pretty wedding took place at Knox United Church at noon on Friday, August 30, when Jean Murray Rothney, youngest daughter of Mrs. J. F. Rothney, of Macleod, became the bride of William Richard Smithson, of Medicine Hat. The bride was given in a beautiful creation of mauve French pebble crepe with chiffon hat of mauve. She wore silver slippers and carried a bouquet of sweetheart roses and sweet peas. Mrs. Marshall Irvin was the matron of honor and Marshall Irvin was the best man. The guests were Mrs. J. F. Rothney, Mr. and Mrs. E. Baxter, Mrs. Davies, Mrs. A. Chalmers, Mrs. A. Kirkham, Mr. and Mrs. Marshall Irvin, Mrs. Jordan, Mr. Somerville, Mrs. Beard, Mrs. Mabel Mappin,

Miss Forster, Miss Fieger and Miss Arnold. Several of the patients of the Children's Red Cross Hospital, of which the bride was a member of the nursing staff, were present at the ceremony. Later Mr. and Mrs. Smithson left for a trip to Banff, Lake Louise and other points. On their return they will make their home in Medicine Hat.

Miss Irene Helma Young, of Macleod, has been awarded the Special Certificate granted to those candidates who have been successful in passing all grades from elementary to advanced in the piano forte examinations of the Associated Board Royal Academy and Royal College of Music. Miss Young, who is a pupil of Mr. Moller-Langdale, L.A.B., A.R.C.M., L.R.A.M., is now studying for diploma of licentiate of the Board (L.A.B.).

The first sitting, after the long vacation, of the District Court of Macleod, was opened on Tuesday morning, with His Honor Judge A. M. MacDonald on the bench. There were seven cases down on the docket for hearing, principally small and large debt cases, but every one of the seven was adjourned till next Court. There was one naturalization case, that of H. Edvardson, Granum, who was accepted as a British Subject after being examined by the Judge.

W. Anderson, construction engineer of the Calgary Hydro-Power Company, passed through Macleod on Tuesday on his way to Pincher Creek and Cardston, where he was successful in signing up contracts with both towns for hydro-power from the company. Mr. Anderson returned to Macleod and was a guest at the American Hotel, returning to Calgary on Wednesday forenoon. Mr. Anderson stated that the new Ghost River plant will be in operation on the 15th of October, and that the work of connecting up Macleod is already commenced.

## MANY BRITISH JUVENILES COMING TO CANADA

Montreal, Sept. 10.—"The migration of British juveniles for farms in Canada, is one of the most promising features of the immigration situation at the present time," stated R. M. Pym, superintendent in Britain of juvenile immigration for the Colonization Department of the Canadian National Railways, who arrived in Montreal on the White Star liner, "Laurentic" for the annual conference of National Railway Colonization department officials. Mr. Pym arrived with the final party of British juveniles for the season, numbering some 83 boys, and commenting on the amazing development of juvenile immigration from the British Isles Mr. Pym stated that altogether this season a total of 1,180 boys had been brought out under the auspices of the Canadian National Railways. This was an increase of 134 per cent over the season of 1928, and when it was considered that 1928 season showed an increase of 84 per cent over 1927, it could be realized to what a great extent juvenile immigration had become a factor in the general situation.

More than 1,000 of the boys coming forward this year, are placed by the British Immigration and Colonization Association, of Montreal, on farms throughout Ontario. The balance have been placed by other organizations in both eastern and western Canada. "About 97 per cent of these boys have definitely made good," said Mr. Pym. "Something like one half per cent have had to be deported, while the remaining small percentage might be said to be still on the fence, with respect to their desire to stay in this country."

Generally speaking, the boys come from good middle-class families and many of them are fairly well educated, bright and enterprising and eager to make a career for themselves in the new country.

"One of our greatest difficulties, in juvenile immigration work," said Mr. Pym, "has been the prevalence of the old idea, still persisting in the Old Country, that boys and young men were sent to colonies only as a last resort, if they were wayward or criminally inclined. It is surprising to what extent that idea still persists, and it is only gradually that we are replacing this with the true idea that Canada is a wonderful land of opportunity, and that British boys and Britishers in general are welcome here and that in this country they may build for themselves a future not possible in the old world."

## THE CAUSE OF FERMENTATION OF HONEY

Spoilage of extracted honey due to fermentation and souring has become, particularly of recent years, a matter of concern to Canadian beekeepers and others engaged in the handling and marketing of this product. In former years fermentation, though not unknown to honey producers, did not present the menace it now does as long as relatively little of the honey crop was held over from one season to the next. Recent years, however, have witnessed in Canada an increased production of honey, while consumption has become less seasonal in nature, with the result that honey, in general, is now held for longer periods of storage than formerly. Consequently spoilage through fermentation is now being encountered to such an extent that it is one of the most serious problems facing those engaged in the honey industry and the source of considerable financial losses.

For the past two years the Division of Bacteriology, Central Experimental Farm, has been conducting investigations on honey fermentation, the first phases of which have been concerned with the organisms causing the spoilage and their possible sources. In all cases yeasts have been found to be responsible, four different types having been isolated from the samples of fermented honey examined. These yeasts were found to be particularly

# New Fall Ready-to-Wear at Reach & Company Ltd.

You will find a variety of selection never before available in this store. New up-to-the-minute clothing of superior quality bought right and priced right.

## Women's Wear

## NOTHING LEFT

An old southern Negro was asked by the proprietor of a store how he happened to need credit when he had such a good cotton crop.  
"De ducks got 'bout all that cotton, sah," was the mournful reply.  
"What do you mean, the ducks got it?"  
"Well, you see," explained the old man, "I sent dat cotton up to Memphis, and dey deducks the freight, and dey deducks the storage charge, and dey deducks the tax—yes, sah, de ducks sho did get 'bout all dat cotton!"—Pacific Power and Light Co. Bulletin.

## INDEPENDENT

## SOLVING THE FUEL PROBLEM

An attorney who advertised for a chauffeur, when questioning one of the applicants, said: "How about you, George; are you married?"  
"Now, sir, boss; now, sir; Ah makes my own livin'!"—Montreal Daily Star.

"Are you going to put in an oil burner for your furnace next winter, as you expected?"  
"No, I get so many automobile and other circulars in the mail now that I believe I can heat the house with them!"—Pathfinder.

Vol. 1, No. 21

Macleod Thursday, Sept. 12, 1929

Watch for the "News" each week. Suggestions and news items invited.

Claude Tweed, Editor

I stole a kiss the other night. My conscience hurt, alack!  
I think I'll have to go tonight And give the darn thing back.

McCormick-Deering Hay Presses are made in several sizes, to meet the requirements of the man who bales his own hay or the man who engages in custom baling. Ask us to quote you on the size and equipment you require.

Do not paint your newly plastered walls for at least six months, and preferably a year. This is because the new plaster contains so much uncombined lime that it will act on the paint and cause blotches.

How would you like to put your own hay or straw into compact, easy-to-store, marketable bales, and then earn some extra money by doing the same for a number of your neighbors? If you'll come in we'll show you a McCormick-Deering Hay Press that will do all of this for you, and you will be surprised at the low price and convenient terms.

A waiter is an inn-experienced servant.

Put your hay or straw through one of those dandy new McCormick-Deering Hay Presses and it comes out "frozen solid" into bales that are easily

handled, easily stored, easily shipped, and commanding top prices.

The largest fortune in the world is said to belong to an Indian Prince. His estate is estimated as being worth in excess of two billion and his income is just a "trifle" over \$200,000 a day.

Personally speaking, we'll bet we could worry along pretty well on his "trifle."

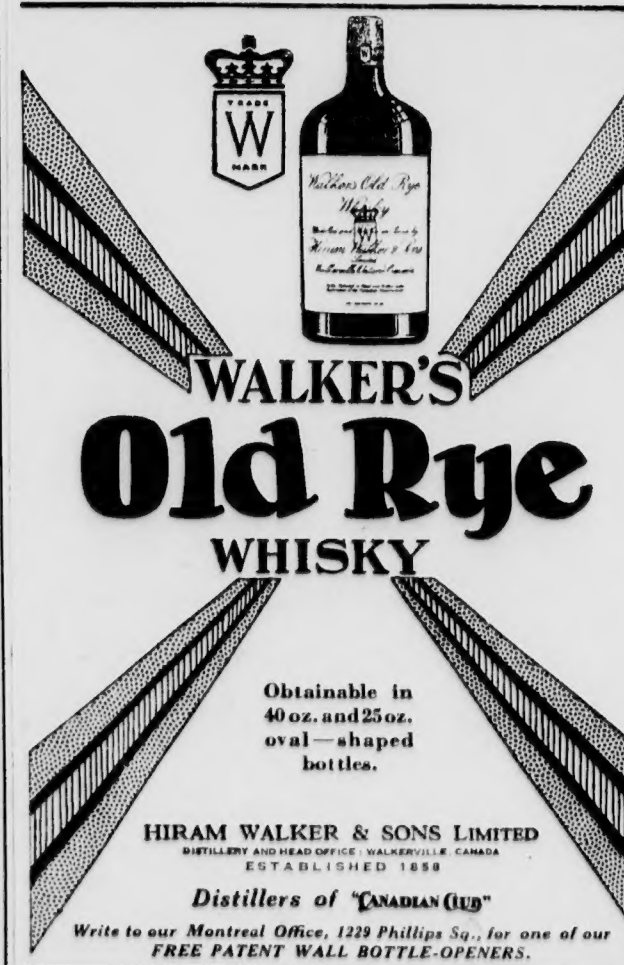

Have you a harvester-thresher? They are becoming mighty popular around here, which means there will be a lot of grain hauled out of rough stubble fields and direct to elevators during next harvest. That's where the International "Six-Speed Special" Truck shines. Six speeds forward and two reverse for power a-plenty in the hard going and all the speed you can use on the road.

All who carry hammers and knock are not blacksmiths.

When may we give you a real demonstration of the International "Six-Speed Special"?

We shall soon receive a new shipment of International "Six-Speed Special" Trucks. They're nearly all sold in advance, but we can let you in on this shipment if you act quickly.

The best machine will break down occasionally, but it is our duty to put it back in shape with the least possible delay. Give us a chance to perform.
